

MIGS Annual Report

June 2022 to March 2023

Context

This report applies to a nine-month period, which could affect the statistics presented:

- Member renewal efforts are ongoing
- A reduced amount of time for project completion
- The annual MIGS Forum was not held during this period

New Member Interest Group

There are **22** member interest groups

In November the Council reviewed and approved the expression of interest to form a new group—Health and Environment. The group's main objective is to address the needs of family physicians in understanding the effects of environmental changes on human health, from pollution and climate change to related toxicologic and zoonotic illnesses.
