Aberrant Drug-F	Related	intake																			
Behaviours	S	int																			
requests early refills																					
requests dose increases																					
requests opioids for travel or work																					
increases dose without authorization																					
replaces vomited dose																					
hoards opioid																					
uses opioid for sedation or stress																					
opioid withdrawal symptoms																					
nonadherent/resistent to non-opioid Rx																					T
multiple contacts between appointments																					
requests faxed Rx/walk in appointments																					
misses appointments																					1
multiple injuries or accidents																					
opioid binging																					
uses opioids for euphoria																					
reports lost or stolen prescription																					
sells or gives away opioid																					
attempts to get opioid from other prescribers																					
gets opioid from non-medical sources																					
changes route of administration	on (IV/nasal)																				
involved in street drug culture																					
abuses alcohol or ilicit drugs																					
drug related crime																					
forges prescription																					
refuses urine drug test
