UPDATE FROM THE CHAIR

Hello from the Child and Adolescent Health Program Committee,

We are very pleased to announce our plans for FMF 2015. We have a full program that highlights health issues relevant to all ages:

- sports medicine in children and teens
- sun protection for infants
- mental health and comorbid disorders in adolescents

We are working on new practice tools to assist in management of health issues in university and college students ages 18 to 25 (also known as emerging adults). These initiatives have strengthened in the past year and are a natural extension of our focus on Adolescent Health and Transitions and Shared Care with our Canadian Pediatric Society Colleagues on the Joint Action Committee on Child and Adolescent Health (JACCAH).

We continue to work with our partners at the Canadian Pediatric Society and endorse many of their newly released and updated position statements (www.cps.ca)

Our community of practice in family medicine has over 900 members and we always appreciate your support in committee membership with our pediatric partners and in research projects. If you have any particular areas of interest, please notify Maureen Desmarais at mkd@cfpc.ca

Sincerely,
Dr. Patricia Mousmanis
Chair, Child and Adolescent Health Program Committee

Committee members:

Dr. Patricia Mousmanis, Chair, ON
Dr. Sanjeev Bhatla, AB
Dr. Carol Scurfield, MB

Dr. Pierre-Paul Tellier, QC
Dr. Roxanne MacKnight, NB
Dr. Sam Chippin, Resident Rep
