Acknowledgements

The College of Family Physicians of Canada would like to acknowledge the many members who have contributed to the development of this comprehensive set of evaluation objectives. These individuals have participated in various ways, at various times. The Board of Examiners, the Committee on Examinations, and the Working Groups on the Certification Process and on Procedure Skills have played major roles. About 500 members helped by responding to the surveys that were done to establish and validate our basic priorities for the assessment of competence to practice family medicine. Many others in our community have provided insight and feedback, and continue to do so, as the components of these objectives have been presented and tried “in the field” across the country.

The principal authors of this report are: Tim Allen, Cheri Bethune, Carlos Brailovsky, Tom Crichton, Michel Donoff, Tom Laughlin, Kathrine Lawrence, Stephen Wetmore.
Bibliography

These are the principal references used during this work. They have not been referenced directly to the text so as not to interfere with reading in this format. They are listed alphabetically by author.
