Embracing the Now!
Promoting Resilience in Adolescents and Health Providers With Mindfulness

Family Medicine Forum
Vancouver, British Columbia
November 7, 2013
Dzung X. Vo, MD
Clinical Assistant Professor
Adolescent Medicine
BC Children’s Hospital
University of British Columbia

Disclosures
I have no conflicts of interest to disclose

Acknowledgments
• Jake Locke, MD
• Kim Schonert-Reichl, PhD
• Nimi Singh, MD
• Canadian Paediatric Society, Adolescent Health Section

Learning Objectives
1. Describe benefits of mindfulness practice to promote resilience in adolescents
2. Appreciate the importance of mindfulness practice for health providers
3. Experience how mindfulness practice can be used in daily life and clinical practice

Invitation to You
• Experiences of Mindfulness
• Let go of expectations
• Open Mind, Open Heart
Guided Practice: Mindfulness of Breathing

What is Mindfulness?

“Paying Attention in a particular way: On Purpose in the Present Moment and Non-Judgmentally”

- Jon Kabat-Zinn

Mindfulness Practice is...

Autopilot    Awareness

Doing    Being
Mindfulness Practice is...

Past/Future  Here and Now

Mindfulness Practice is...

“Reacting”  “Responding”

Mindfulness Practice is...

Ruminating  Letting Go

Mindfulness Myths

- Having a “blank” or “empty” mind
- Seeking “bliss”
- “Escaping pain”
- Relaxation exercises
- “Zoning out”
- “Navel Gazing:” Withdrawing from life

Is Mindfulness a Religion?

Present in ALL Wisdom Traditions

Mindfulness-Based Stress Reduction (MBSR)

- Centuries: Eastern meditation traditions
- 1979: Stress Reduction Clinic, University of Massachusetts Medical School
- 8-week Program
- 2009: Over 240 hospitals and clinics
Mindfulness: Clinical Interventions

- MBSR: Mindfulness-Based Stress Reduction (Kabat-Zinn)
- MBCT: Mindfulness-Based Cognitive Therapy (Segal, Williams, & Teasdale)
- DBT: Dialectical-Behavioral Therapy (Linehan)
- MBRP: Mindfulness-Based Relapse Prevention (Bowen, Chawla, & Marlatt)
- MB-EAT: Mindfulness-Based Eating Awareness Training (Kristeller et al)
- MBCP: Mindfulness-Based Childbirth & Parenting (Bardacke)
- MBSR-T (Teens) (Biegel)
- MARS-A: Mindful Awareness and Resilience Skills for Adolescents (Vo & Locke)

Clinical Trials: MBSR

- Large body of literature
- Improvements in Psychiatric and Medical symptoms
- Outcomes
  - Chronic Pain
  - Anxiety
  - Perceived Stress
- Medical Sx's
- Greater Energy
- Improved sleep

Baer R. Clinical Psychology: Science and Practice 2003;19(2) 125-143.

MBSR: Neuroplasticity

- N = 26 adults
- Outcome:
  - Reduced perceived stress
  - Decreased stress correlated with decreased amygdala grey matter

Mindfulness for Youth

An Emerging Field

Case: 16y Female

- 16y Female
- Generalized Anxiety, Panic, Depressive symptoms
- Recurrent Abdominal Pain: “Irritable Bowel Syndrome”
- Strengths: Volleyball player, humorous

Video: Kelty Mental Health Resource Centre

http://keltymentalhealth.ca/healthy-living/mindfulness
Case: 16y Female (cont’d)

- Missing school several days per week
- Anxiety: “I freak out”
- Physical symptoms: “I get sick at school and need to leave”
- Falling behind academically
- Missing volleyball practices and games

Youth Stress: BC Youth

Mindfulness and Adolescent Development

- Promote development of emotional regulation?
- Promote development of resilience pathways?
- Reduce health risk behaviors?
- Provide lifelong skills?

Mindfulness with Children & Adolescents: Clinical Trials

- Preliminary evidence for benefits:
  - Increased attention (ADHD)
  - Blood pressure, Sleep
  - Mood: Anxiety, Depression, PTSD
  - Positive Affect
  - Substance abuse
  - Family Functioning
- Research still in early stages

Adolescent Morbidity: Stress and Coping

- Depression,
- Anxiety
- Pregnancy, STI’s
- Substance Use
- Eating Disorders
- Self-Harm
- Youth Violence
- Chronic Pain
- Chronic Illness Management

Adolescent Brain Development

Mindfulness in Education

• Cognitive
• Social skills
• Emotional regulation
• Teachers: Self-efficacy, Classroom Management
• Vancouver: MindUP (Grade 4-7)

BC Children’s Hospital: MARS-A

• “Mindful Awareness and Resilience Skills for Adolescents”
• Adapted from MBSR (Kabat-Zinn), MBCT (Segal et al), MBSR-T (Biegel)
• Adolescents age 14-19y with psychological distress
• With or without chronic illness, chronic pain

BC Children’s Hospital: MARS-A

• 8-week group mindfulness training
• Weekly sessions + half-day (weekend)
• Skills training course: not “therapy”
• Referrals: Medical, Mental Health Providers

Formal Mindfulness Practices

• Sitting Meditation
• Walking Meditation
• Body Scan
• Mindful Movements (Yoga, Tai Chi, etc)

Informal Mindfulness Practices

• Not taking specific time “just” for mindfulness
• Walking
• Eating
• Listening and speaking (Engaged Mindfulness)
• Becoming mindful in all moments of daily life (Stepping out of “Automatic Pilot”)

Back to the Case: 16y Female

• MARS-A x 8 wks
• Week 5: “I had a stomach ache and I thought I was getting sick. Instead of leaving, I did a breathing meditation. I tried not to fight the pain. I tried riding the waves of my pain.” Stayed in school for first time when “sick”
• Week 8: Had not missed school x 3w
Mindfulness for Providers

Teaching Mindfulness, Mindful Listening, Self-Care, and Secondary Trauma

Teaching Mindfulness

“Take my advice, I’m not using it”

Self-Care for Providers

“Remember, the heart must first pump blood to itself”
- Michael Kearney, M.D.
Palliative Care physician

New York Times (Sep 26, 2013)

Mindful MD’s:
- Better quality of care
- Increased patient satisfaction
- Less stress
- Less burnout

Beach MC. Ann Fam Med. 2013;421-428: 1507
Fortney L. Ann Fam Med. 2-13. 11(5):412

STOP Meditation

Briefly step into present moment

- S  Stop
- T  Take 3 Breaths (or more)
- O  Observe (body, feelings, thoughts)
- P  Proceed

- Whenever you “hear a bell” – i.e., door closing, phone rings, car honking etc
- Whenever you feel stress arise

“I've learned that people will forget what you said, people will forget what you did, but people will never forget how you made them feel.”

-- Maya Angelou
